### ABOUT ME

As a developer, I like to bring new and innovative ideas to the team, always striving to improve my skills. I do well with back-end development, however I thrive with front-end development since it gives me the chance to explore my creativity.

### PROJECTS

#### [ACADEMIC] FRONT-END DEVELOPER – ECOMMERCE NOKLER 2022

I developed an e-commerce with a team. We made weekly sprints to present our progress with the app to the Product Owner. The e-commerce named Nokler was created to sell digital keys for videogames, available for various platforms.

Nokler's characteristics:

- Basic features (C.R.U.D. of productlist, Auth, catalog, checkout, refund, etc)
- Payments integrations (Stripe)
- Transactional emails (Nodemailer)
- Shopping cart
- Administration panel

#### [ACADEMIC] FULL-STACK DEVELOPER – VIDEOGAMES APP 2021

Development of a SPA using React for the Front end, and Redux as stage management. The components were developed with CSS without the use of external libraries. It consumes data from an API through a Back end developed in NodeJS using Express, adding new functionalities to the original API.
